→ To Purchasers.

SEPTEMBER, 1885.

S customary at this season, we present herewith our general Price-List of Autumn Bulbs, Seasonable Seeds, etc. We ask for it your kind attention, and hope that on looking it through you will notice many varieties of Bulbs you need, find our prices satisfactory, and be pleased to favor us with your orders.

Our Bulbs will be found to be true to name, and of strongest capacity. While we aim to supply at the lowest market rates, we have imported for our customers the most expensive grades, believing the strongest and finest Bulbs will well repay any trifling additional cost over the ordinary grades; especially is this true of Bulbs for forcing.

Our Terms are Net Cash. All bills on which short credits are allowed are due on the first of the month succeeding the date of purchase. Bills on which longer time is desired must be provided for by special agreement.

Orders. All orders from known correspondents (cash or accepted credit) will at all times receive our careful and prompt attention. Orders from unknown correspondents will receive equal attention, if accompanied by a remittance for the amount of the order, or satisfactory references.

Remittances. Remittances may be made by Post-Office Money-Order, Bank Draft, Registered Letter, or, for amounts less than two dollars, in Bank-Bills, at our risk. For fractional parts of a dollar, postage-stamps may be sent.

Bulbs by Mail. We send Bulbs by mail, *post-paid*, to all parts of the United States at the mail price especially noted.

Address, etc. Persons ordering Bulbs by mail are requested to be particular to write their own NAME, and also the names of their Town, Post-Office, County, and State, plainly, and Not to omit either, as serious delays are occasioned by such omissions. If Bulbs ordered are not received within a reasonable time thereafter, notice should be sent us, so that the delay may be accounted for and remedied at once.

HYACINTHS.

HYACINTH.

THE Hyacinth is a universal favorite, both for Winter blooming in the house, either in earth or water, and for Spring decoration in the garden. Our list comprises bulbs of all colors, both single and double.

NAMED HWAGINTHS.

Finest selected bulbs. Especially adapted for growing in earth or water, or for forcing. By mail, at prices quoted.

ROMAN HWAGINTHS.

Extensively used for forcing and house-culture, flowering from three to four weeks earlier than the Holland Hyacinth. Flowers pure white, each bulb producing several spikes. 75 cents per dozen. By mail, 25 cents per dozen, extra.

TULIPS.

By mail, 15 cents per dozen extra.

THE ease with which this beautiful flower can be grown, and its great beauty, make it very desirable both for house and garden. They will thrive in any good garden soil. The Early Single Tulips are best adapted for forcing in the house. The Duc Van Tholl Tulips are all adapted for forcing, and may be had in bloom by Christmas. They are the earliest of all Tulips.

NARCISSUS.

By mail, 3 cents each, 30 cents per dozen extra.

THE Narcissus is a very fine class of earlyblooming flowers, including well-known Daffodil the and Jonquil. The Polyanthus Narcissus are all adapted for forcing; while the Double and Single varieties are very fine for bedding in the garden. A rich soil, made porous with plenty of sand and wellrotted manure, is best adapted to their culture.

RANUNCULUS.

By mail, 5 cents per dozen extra.

REE-blooming, large flowers of all colors. They succeed well in any good garden soil. The Turban varieties do best for indoors, and are very showy; keep them in a cool, moist atmosphere.

				DOZEN
Double	French)	
Double	Persian		}	\$ 0.25
Double	Turban			

RANUNCULUS.

SNOWDROPS.

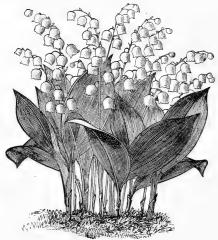

By mail, 6 cents per dozen extra.

PLANT in clumps two inches deep. They are perfectly hardy.

LILY OF THE VALLEY.

By mail, 5 cents per dozen extra.

ROBABLY no plant is so well known, and such a universal favorite, as the Lily of the Valley. They

do well in the garden, and may be put under the shade of trees; but wherever placed the roots should not be disturbed for several years, as frequent moving prevents their blooming. They grow well in pots, and are much used for forcing.

LILY OF THE VALLEY.

DOZEN. HUN.

Flowering Pips (Ready for delivery in November), \$0.40 \$2.75

LILIUMS.

By mail, 3 cents each, 30 cents per dozen extra.

ILIES delight in light rich L soil, such as is afforded by a mixture of loam and wellrotted manure, and should be planted in the dryest spot possible, where water is not liable to stand in Winter. A good mulching of leaves or coarse manure will prove highly beneficial, in preventing them from being thrown out by the frost. July and August is the usual season of blooming. They may be planted either in Spring or Fall; but Fall planting is conaidared heat

LILIUM AURATUM.

sidered best.	
EACH,	DOZEN.

FRUIT CULTURE

AND THE LAYING OUT AND MANAGE-MENT OF A COUNTRY HOME

By W. C. STRONG

EX-PRESIDENT OF THE MASSACHUSETTS HORTICULTURAL SOCIETY,
AND VICE-PRESIDENT OF THE AMERICAN
POMOLOGICAL SOCIETY

ILLUSTRATED

"Forward, graffe, set, plant, and nourish up trees in every corner of your grounds: the labor is small, the cost is nothing, the commoditie is great, yourselves shall have plenty, the poor shall have somewhat to relieve their necessitie, and God shall reward your good mindes and diligence."

- XII. The Currant. Insects Attacking the Currant. The Gooseberry.
- XIII. The Raspberry. The Blackberry.
- XIV. The Strawberry.
- XV. The Mulberry. The Fig. Rhubarb. Asparagus.
- XVI. Propagating Fruit Trees. From the Seed. By Division. By Cuttings. By Layers. By Budding. By Grafting.

NOTICES OF THE PRESS.

In his treatise on "Fruit Culture," Mr. Strong gives evidence of that thorough grasp of the subject which he has gained from thirty years' experience as an orchardist. His book is a simple, clear, well condensed manual of practical information on the fundamental principles involved in the successful cultivation of each species of fruits. The happy suggestions on the laying out and management of a country home, the special attention given to the habits of the insects injurious to fruits, and the numerous woodcuts illustrating the salient features of the text are, in themselves, more than sufficient to recommend this little guide to all interested in horticulture or in fruit-tree culture. — Boston Advivertiser.

Numerous works have appeared from time to time on fruit culture and kindred topics. One would think there was no room for more. But in no branch of intelligence has there been so much advance as in horticulture. Every year solves new problems insoluble before, and with new ideas new books follow. It is in just this line—in the endeavor to elucidate fundamental principles—that Mr. Strong believes he finds an unoccupied field, and this book is the result. In the peculiar field it is destined to fill it will be found very useful. — Gardeners' Monthly and Horticulturist (Philadelphia).

A most inspiring little book, and one that fairly makes the mouth water, the subjects treated are so suggestive of flavor and fineness. Country readers, or even those owning small plots in town, will be possessed, after reading Mr. Strong's chapters, with a desire to turn horticulturist or orchardist as soon as possible. Small fruits are not neglected amid the details of planting and training peaches, cherries, plums, grapes, and quinces, apples, pears, etc., in chapters that glow with color. Practical rules and shrewd observations are condensed within the pages which treat of soils, injurious insects, and "blights," and the general discouragements as well as the rewards of "Fruit Culture." — Philadelphia Ledger.

This book is full of valuable suggestions on the culture of fruit; and a careful perusal might save the amateur gardener many mistakes, which in point of time, emphatically, cannot be afforded if he wishes to sit beneath his own vine, and eat the fruit of his own labor. A well-chosen list of pears is given, which will, without waste, supply a continual rich dessert for six months of the year. . . . We cordially recommend the book to those who are interested in horticulture. — Portland Press.

An excellent manual for the beginner in the cultivation of the larger and the smaller fruits. It is conservative in its notices of novelties, and necessarily brief in its details, but covers the whole ground in an elementary way. . . It is reliable advice, based upon thirty years' experience. — Christian Register (Boston).

The opening chapter, on "Rural Homes," gives really practical and wise advice about locality and the treatment of the spot selected, with clear directions for constructing a good lawn. . . . The remaining fifteen chapters are all devoted strictly to the culture of fruit. . . Though Mr. Strong writes from the standpoint of a Northern man, there is very little in his book that will not be found applicable to fruit culture in the South as well as the North. — Charleston News and Courier.

A valuable little handbook. . . . The author has shown excellent judgment in giving the particular information which small-fruit raisers most desire to know. Descriptions are given of the best kinds of garden fruits, with advice as to soil, transplanting, culture, and general treatment, with suggestions as to the treatment of fruit diseases, and the destruction of insects. — Boston Transcript.

It has the weight of authority. It is a compact work, sensible and perfectly intelligible; scientific, yet not too technical; and adapted well to meet the practical wants of the public. There are helpful illustrations, and we have no hesitation in commending the book. — *The Congregationalist* (Boston).

People who own small patches with what the Anglomaniac calls boxes upon them, and who indulge in expensive experiments in the direction of home production, need just such a book as this to keep them from wasting their substance in riotous sampling of nature. — The Art Age (New York).

A compact little volume, into which Mr. Strong has compressed the knowledge gained by thirty years of experience. . . The book is clear, condensed, and convenient in arrangement, and is particularly well adapted to the needs of amateur fruit-raisers. — Boston Yournal.

Those of our readers interested in fruit culture will find much profit in this book. The directions are specific enough to be understood by beginners and wise enough to be of profit to experienced fruit-growers. — *Home and Farm* (Louisville).

The work will be found a valuable one. — Boston Traveller.
